*KMC SIDE ROD FITS CORRECTLY. Other ones available are cheaper, but do NOT fit correctly inhibiting steering.

TIRED OF DRIVING WITH A CRACKED & DETERIORATING STEERING WHEEL? Don't just cover it up or fill in the cracks and paint it, it'll just crack again in no time flat. Replace it with a KMC recast steering wheel. We remove the old plastic from the rim & sandblast the wheel to bare metal, cast on a new urethane rim, then finish off the hub and spokes with a durable high gloss urethane paint for that factory fresh look and feel.
