Our many projects range from show cars to daily drivers. We also rebuild many components and prefer your original part to aftermarket parts.

Using this Catalog

Parts listed in this catalog are currently available, normally stocked items or those planned for production. Quantity represents the number of pieces required for the car; price is for each or one item. Unless otherwise indicated, all items are New or New Old Stock. (X) - indicates rebuilt items sold exchange only. Your rebuildable part must be received in exchange before one is shipped. A number following in the parenthesis indicates items where cores are generally available. The number represents a core charge that will be added to your invoice, where cores are available. The core charge is refunded upon receipt of your rebuildable core. (U) - indicates used parts. Price and availability is subject to change without notice due to impending tariffs and raw material price increases.

Backorders

We normally stock all items in our catalog. From time to time some items may be temporarily out of stock or no longer available. These items will be indicated as backordered on your invoice. In most cases, backordered items will ship within 1-2 weeks. Occasionally certain items take longer. Any backordered item not shipped within 60 days of the original order will be automatically dropped unless specifically requested otherwise.

Rebuilding Components

Many parts and components are rebuilt here at our Dallas Texas facility. Those parts marked with (X) are for rebuilding only. You must send in yours to be rebuilt as we no longer have acceptable cores.

When sending in your core, please make sure there are no liquids (fuel pumps, carburetors, injector pumps etc) and exterior is clean. Wrap part in plastic, then package with plenty of bubble wrap or crumpled newspaper. Include your contact information INSIDE the box. Upon arrival we will contact you letting you know we received item, and will evaluate part for rebuilding.
